## **SCOPE OF WORK**

### **SECTION II**

#### **EMERGENCY WORKER BASE CAMP & TYPED SUPPORT PACKAGE REQUIREMENTS**

The nature and scope of a particular incident will determine the nature and scope of the response. Any response will require various materials, supplies, equipment, and human resources. The State of Florida has developed Emergency Worker Base Camp Packages that are now the national standard and provide the required resources and flexibility to support a particular incident. Other “Typed” support packages have also been developed to provide resources to fill anticipated needs during specific incidents.

The following pages provide the specifications, footprint, and layout for Type I through IV base camps. There is no footprint available for Type V-Mobile. However, requirements for Type V-mobile are listed in the following pages. Base camps are configured to support from 100 to 1,000 emergency workers or evacuees. Depending on the nature and scope of the incident, vendors may be asked to deploy one or more types of base camps to support either emergency workers or displaced populations.

**BASE CAMPS:**

Base camps are established as required in areas close in proximity to emergency impact areas. The purpose is to accommodate emergency workers responding to events in areas either where there are limited hotel/motel resources, or when occupying hotels/motels would not permit disaster victims from relocating from shelters into hotel/motels, thus extending the emergency shelter phase of the operation. Commercial contractors/vendors providing "turn-key" services will be considered the primary source of the establishment of base camps. For larger camps, Types can be combined at one site, such as a Type I and a Type II to build a 1,500 person camp.

The Contractor should have an ability to construct the base camps and habilitate responders, recovery workers, military and relief agency workers with tents or modular units, provide air conditioning, heating, beds and/or cots, bedding, dinning halls, kitchens, medical unit, reefer trucks to haul food & Ice and store, 4 meals a day, shower units, hand wash units, potable (drinking) water, water purification and manifold distribution systems, toilets, on-site manifold distribution of black and grey water and associated On- Site Sanitation Systems, laundry service, leveled hardwood floors, industrial generators, diesel 4000 watt light towers, utility vehicles, tooling and equipment for plumbing, electrical, instrumentation, and other consumables including kitchen utensils,. Contractor shall also provide operations centers, recreation facilities and communication services to include telephone and wireless internet connectivity. The Contractor shall keep all of their assets mobile, staged with their own fleet of tractor-trailers, and shall be able to keep those assets available for rapid deployment if required by the Government.

Detailed Scope of Work, specifications, terms, and conditions must be negotiated between the government entity and contractor.

There are six levels of Base Camps:

- Type I support 1000 persons
- Type II supports 750 persons
- Type III supports 500 persons
- Type IV supports 250 persons
- Other: Mobile Life Support Trailers
- Type V: 53' Self Contained Semi-Trailers
- Type VI: 40' Motor Homes
- 32' Travel Trailers

**OVERVIEW of Services provided at a Base Camp includes:**

**Staffing and Management:**

- Camp construction is considered turn key, bare base, meaning that no on-site infrastructure is technically required to build the camp. Camp construction, engineering and support services are all provided by one prime vendor, who may or may not in turn let sub-contracts for various items or services in the camp.
- Prime contractor provides all engineering and support staff.
- Overall, camp management is the responsibility of government at some level with the assignment of at least a Type III IMT or IST.

**Billeting / Camp Type:**

- First choice of accommodations is the conversion of a fixed facility / building to accommodate personnel. Such conversion includes installation of dividing walls, partitions or curtains in order to allow for some privacy.
- For larger operations hard-sided tents, long span structures or soft-sided tents or CONEX Systems can be used as billeting. Tent camps can take from 48-96 hours to set-up and must conform to normal wind loading of 45 MPH sustained, or 75 MPH in hurricane areas, based on previous events where storms crossing over the camp has done significant damage to these

structures. Hard sided tents are preferred over soft sided. Tents must be fitted with floors and HVAC systems for climate controlled living conditions.

- For small deployments or where teams are moving from site to site every 1-2 days, self-contained 53' semi-trailer bunkhouses, travel trailers or CONEX mobile bunkhouses or RV's can be utilized. Trailers can accommodate six personnel, while bunkhouses accommodate 10 personnel. 53' semi-trailer can accommodate 12-24 persons.

***Food Services:***

- Food services will be accomplished through contract catering. Four meals per day will be served in accordance with current US Forest Service Catering Contracts. An approved 14-day rotation meal plan will be established. Food service facilities must meet all required public health code requirements to include a commercial grade (restaurant) NSF approved equipment, sealed floor, HVAC, bug screens and/or air curtain blowers, equipment and utensil sanitation, fire suppression, and hand wash stations in numbers appropriate for the size of camp. Camp catering must be able to feed at least 30% more persons above camp residents

***Shower Accommodations:***

- Shower trailers or CONEX systems will be brought in. These trailers/CONEX typically accommodate 6-10 persons at a time, include a changing room. Trailers have a high capacity hot water heater, typically fueled by propane or diesel fuels. Camp must be able to shower 20% more persons above camp residents.

***Restroom Accommodations:***

- Porta-potties will not be used unless no other resources were available, except in remote area such as parking and service areas. Restroom trailers or CONEX systems will conform to ANSI 4.4 regulations. Restroom trailers resemble a public restroom, are well lighted, have mirrors, sinks, toilets, and urinals. Versions are available both men and women. Camp must be able to accommodate 20% more persons above camp residents.

***Laundry Facilities and Services:***

- Portable laundry trailers or CONEX systems come in two configurations, self-service and commercial. In the self-service, workers can do their own laundry just like in a laundromat. In the commercial version, a contract service will be brought in to wash, dry and fold laundry for base personnel.

***Medical Care:***

- A basic medical clinic will be provided to afford routine medical check-ups and care. Contractor shall establish the area and provide basic equipment. Medical supplies, equipment, and services shall be provided by either EMS or public health personnel. Any emergency will necessitate calling 911.

***Moral, Welfare and Recreation Facility:***

- Between meal periods, the dining tent will be used as a recreation facility for Type IV, V, and VI camps. On Type I, II and III camps accommodating over 500 personnel, a separate tent facility will be provided with recreation items such as a Ping-Pong table, large screen TV, reading library, daily newspapers, board games, cards and other items to afford workers a means to relax between shifts. Internet workstations shall be an option for personnel to check e-mail or document work related activities.

**Administration:**

- Personnel check-in. Agencies sending emergency personnel to a Base Camp will identify those personnel by name / agency to the Camp Manager in advance of arrival, or issue a separate credential. Camp Managers in the Administration Unit will assign berthing space to individuals. Each person shall be issued a unique identity card indicating the level of services the person is entitled to at the camp.
- Three levels of check-in, and issuance of identity cards / credentialing are designated:
  - Resident – Full time sleeping, dining and full services
  - Meals and Showers Only – Typically for commercial trucking personnel who sleep in their trucks and only require food, shower and laundry support
  - Meals Only – Personnel who will only receive meals at the Camp and reside and shower at other locations or at home.
- Telecommunications
  - Public pay phone trailers will be located within the billeting area, food service, recreation and administrative areas to allow personnel to call family and friends
  - POTS or VoIP telephone lines and ISDN, DSL, Satellite, or fiber optic T-1 lines will be ordered to support the administrative office at the Base Camp.
- Office space will be established to allow for the management of the site
- Life Safety & Security will be mission tasked to law enforcement, fire, and EMS agencies to support camp operations.

## **SCOPE OF WORK**

### **SECTION III**

#### **DESIGNATED COMMUNITY SHELTER REQUIREMENTS**

The Department of Health and Social Services; the American Red Cross; the Delaware National Guard; the Department of Services for Children, Youth and Their Families; the Department of Agriculture; and the Delaware and Kent County SPCAs all share responsibility in the operation and management of community shelters, in coordination with, and support from, other state and local agencies. Specifically:

- The American Red Cross or the Department of Health and Social Services provide sheltering services to the displaced general population.
- The Department of Health and Social Services-Division of Public Health and the Delaware National Guard provides sheltering services to any displaced evacuees with non-acute medical needs.
- The Department of Services for Children, Youth, and Their Families provides sheltering and family reunification services to any unattended children.
- The Department of Agriculture and the SPCAs provide shelter and pet reunification support for displaced companion animals.

Delaware's "community shelter" concept provides for designated space within each shelter facility for each displaced population group listed above as needed, based on the nature and scope of the incident. The concept also designates five (5) companion animal shelters, four (4) large animal shelters, and one (1) wildlife shelter.

## **SCOPE OF WORK**

### **SECTION IV**

## **SCOPE OF WORK**

### **SECTION V**

#### **WASTE REMOVAL AND DISPOSAL SERVICES REQUIREMENTS**

The operation of Commodity Points of Distribution (PODs), Community Shelters, and Emergency Worker Base Camps will generate substantial quantities of bio-medical, human, and animal waste, along with large amounts of garbage, trash, and recyclable materials. Any one of these waste categories could quickly create an unhealthy environment for nearby populations, or those populations supported by PODs, Community Shelters, or Emergency Worker Base Camps. As a result, the State will require the regular removal and disposal of these waste products from one or more locations. Vendors will be tasked to provide the necessary resources to remove and dispose of the various waste categories listed above. Vendors must meet all applicable state or local laws in effect at the time of the incident for the retrieval, storage, and disposal of waste items.

## **SCOPE OF WORK**

### **SECTION VI**

#### **DEBRIS REMOVAL AND DISPOSITION REQUIREMENTS**

The State of Delaware Department of Transportation is the lead agency for the removal and disposal of debris that could be generated due to an incident. The State may require supplemental contractor support to assist with its removal and disposition. Debris could include non-diseased animal carcasses, from main roadways and other locations. Additionally, the State may require supplemental contractor support to appropriately address hazardous materials issues, to include the appropriate and expedient containment, removal, storage, and disposition of hazardous waste materials, or diseased animal carcasses.
